Wireless TV Box from AV Link, Inc.

AV Link's Wireless TV/Multimedia Box allows you to connect video signal sources (DVD, antenna) from one room to a display device (TV) at another room.

The TV Box adopts the 2.4GHz wireless transmission bandwidth, which delivers high performance video signal channels without a single piece of wire.

The TV Box set has the following feature:

1. An IR remote that allows you to control the source device at a remote location at the receiving end.
2. The transmission range of 90~120ft, which would well cover most mid-size houses.
3. Composite RCA terminals that is compatible with most of the standard devices.

Should you be interested in AV Link's Wireless TV/Multimedia Box, please contact sales@avlinkinc.com for more information.

OEM's are welcome.
